## **DETAILED ACTION**

## Response to Amendment

Applicant's arguments filed 3/3/05 have been fully considered but they are not persuasive. The Amendment submitted by Applicant does not overcome the rejection made by Examiner in the last Office action.

Claims 1-16 are rejected under 35 U.S.C. 103(a) as being unpatentable over WO 93/06191, alone, or in view of EP 0990673.

The rejection is maintained fro the reasons as stated in the last office action and for the following reasons:

Note that the claims have been amended to include the characterisatic "such that the film has strong anisotropy" in that it does not determine how strong it is.

Applicant argues that the WO 93/06191 reference discloses that the controlled biaxial orientation is skewed to about 2 to about 88 degrees of normal to the plane of biaxial orientation whereas in the amended claim 1, to form a film that has a strong anisotropy, the controlled biaxial orientation is skewed to zero degree, or to a state where the controlled biaxial orientation corresponds to the direction of the film thickness. The WO 93/06191 reference clearly discloses that the controlled biaxial orientation corresponds to the direction of the film thickness (see last office action).

Further, the use of the term "about 2 degree" corresponds to a plus or minus within 2 and can be closed to 0 degree. Furthermore, a question is then raised what is the basis for Applicant to determine that a film has a strong anisotropy corresponds to the controlled biaxial orientation is skewed to zero degree.

Art Unit: 1711

The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.

THIS ACTION IS MADE FINAL. Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Duc Truong whose telephone number is 571-272-1081. The examiner can normally be reached on Monday-Friday.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, James Seidleck can be reached on 571-272-1078. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR.

Status information for unpublished applications is available through Private PAIR only.
